

### This MotoCAP safety rating applies to:

Brand Ixon

Model Exhaust Ladies
Type Jacket - Textile
Date purchased 23 February 2021

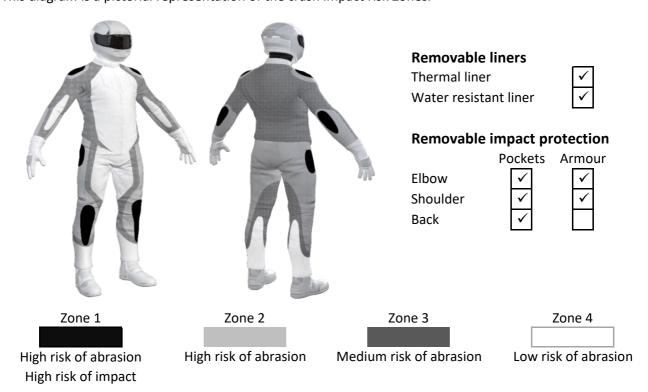

Sizes tested XL and 2XL
Test garment gender Female
Style All Purpose
RRP \$359.95

Test Results Summary	Rating	Score
MotoCAP Protection Rating	**	31.3
Abrasion	1/10	0.58
Burst	10/10	1319
Impact	7/10	50.8
MotoCAP Breathability Rating	+	0.105
Moisture Vapour Resistance	-	186.0
Thermal Resistance	-	0.326
Water resistance	6/10	8.5

This garment is fitted with impact protectors for the elbows and shoulders. A pocket is provided for an aftermarket back protector. There are no vents to allow airflow movement through the garment. This garment has a removable 2 in 1 thermal/water-resistant liner. The breathability rating above was achieved with the 2 in 1 thermal/water-resistant liner removed. When tested with the 2 in 1 thermal/water-resistant liner installed, the breathability rating reduced but remained in the half star range.

### **Jacket and Pants - Crash Impact Risk Zones**

This diagram is a pictorial representation of the crash impact risk Zones.

#### **Abrasion Resistance**

The jacket was tested for abrasion resistance in accordance with MotoCAP test protocols. The diagram below is a visual indication of the likely abrasion performance of the materials in each zone calculated from the data in the table below. The colour coding is based on the worst performing material in each zone.

#### **Abrasion Resistance Performance**

Abrasion rating	1/10
Abrasion score	0.58

<b>Determining Criteria</b>	Area	Good	Acceptable	Marginal	Poor
High abrasion risk	Zone 1 & 2	> 5.6	3.0 - 5.6	1.3 - 2.9	< 1.3
Medium abrasion risk	Zone 3	> 2.5	1.8 - 2.5	0.8 - 1.7	< 0.8
Low abrasion risk	Zone 4	>1.5	1.0 - 1.5	0.4 - 0.9	< 0.4

**Individual Abrasion Resistance Results:** - The table below shows the test results for time to abrade through all layers of the materials. Calculated for each sample by Zone, type and area coverage of each material as a proportion of that Zone. Abrasion times are capped at a maximum of 10.00s.

#### Abrasion time for each test (seconds)

/ IDI GOIOII IIIIIC		onasj						
Zone 1 & 2	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average
Material A	100%	0.76	0.56	0.41	0.59	0.00	0.00	0.58
Zone 3	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average
Material A	100%	0.76	0.56	0.41	0.59	0.67	0.51	0.58
Zone 4	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average
Material A	100%	0.76	0.56	0.41	0.59	0.67	0.51	0.58

# Details of materials used in jacket

Material A Woven fabric shell with mesh inner liner

# **Burst Strength**

The jacket was tested for burst strength in accordance with MotoCAP test protocols. The diagram below illustrates the burst strength results in terms of the likely performance of the garment in an impact and is a pictorial representation of the data from the table below.

# **Burst Strength Performance**

Burst rating	10/10
Burst score	1319

<b>Determining Criteria</b>	Unit	Good	Acceptable	Marginal	Poor
Burst strength	(kPa)	> 1000	800 - 1000	500 - 799	< 500

**Individual Burst Strength Results:** - The table below shows the burst pressure in kilopascals (kPA) for each sample tested by Zone and the average result for each zone.

# Burst pressure for each seam (kPA)

Area	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average	
Zones 1 & 2	1687	1117	1625	1507	890	1648	1412	G
Zones 3 & 4	1038	835	1024	938	983	865.1	947	Α

#### **Impact Protection**

The jacket was tested for impact protection and coverage in accordance with MotoCAP test protocols. The diagram below is a visual indication of the likely performance of each impact protector calculated from the data in the table below. The colour coding is based on the worst performing score for average or maximium force for each impact zone. Areas shaded black are not considered for impact protection ratings.

Impact Protection Performance
Impact rating 7/10

50.8

Impact score

<b>Determining Criteria</b>	Unit	Good	Acceptable	Marginal	Poor*
Impact force	(kN)	< 15	15 - 24	25 - 30	> 30

<sup>\*</sup> Poor may also indicate that no impact protector, or impact protector pocket is present in the garment

**Individual Impact Protector Results:** - The table below shows the test results for each strike on each impact protector in kilonewtons (kN) and their area of coverage as a proportion (%) of the Zone. Individual strike results are capped at a maximum of 50kN.

Impact protector type	Elbow		Shoulder
Average force (kN)	10.9	G	10.9 <b>G</b>
Maximum force (kN)	14.7	G	14.7 <b>G</b>
Coverage of Zone 1 area	85%		95%
Coverage of Zone after displacement	90%		90%

**Individual Impact Protector Results:** - The table below shows the test results for each strike on individual impact protectors in kilonewtons (kN) and the position of the strike. Individual strike results are capped at a maximum of 50kN.

# Force transfer for each impact strike (kN)

Impact protector type	Elbow			Shoulder		
Strike location	Centre	Mid	Edge	Centre	Mid	Edge
Impact Protector 1	10.5	10.2	14.7	10.5	10.2	14.7
Impact Protector 2	9.8	9.7	10.4	9.8	9.7	10.4
Impact Protector 3	9.5	10.7	12.8	9.5	10.7	12.8

#### Breathability

The jacket was tested for breathability following the MotoCAP test protocols. The table below shows the moisture vapour resistance and the thermal resistance values obtained.

Without removable li	iners	With water-resistant liner				
Breathability rating	+	Breat	thability rating	+		
Breathability score	0.105	Breathability score		0.102		
Moisture Vapour Resis	tance - R <sub>et</sub> (kPa.m²/W)	1	2	Average		
Without removable liners	3	208.0	164.0	186.0		
With water-resistant line	r	294.3	296.5	295.4		
Thermal Resistance - F	R <sub>ct</sub> (K.m²/W)	1	2	Average		
Without removable liners	3	0.327	0.325	0.326		
With water-resistant line	r	0.507	0.497	0.502		

# Water spray and rain resistance

This jacket is advertised as water-resistant, and so has been tested for water spray and rain resistance according to the MotoCAP test protocols. The table below shows the water absorbed (ml) and the wetting proportion (%) of the garment and undergarments due to water absorption.

	Water absorbe	ed by garment	Water absorbed by underwear		
	Volume (ml)	Percentage (%)	Volume (ml)	Percentage (%)	
Jacket 1	506	30%	26	9%	
Jacket 2	446	26%	22	8%	
Average	476	28%	24	9%	

### **Location of wetting**

There was minor wetting to the cotton underwear present at the neck for both jackets tested.

Assessment	Deta	IIS.
