

This MotoCAP safety rating applies to:

Brand Dainese

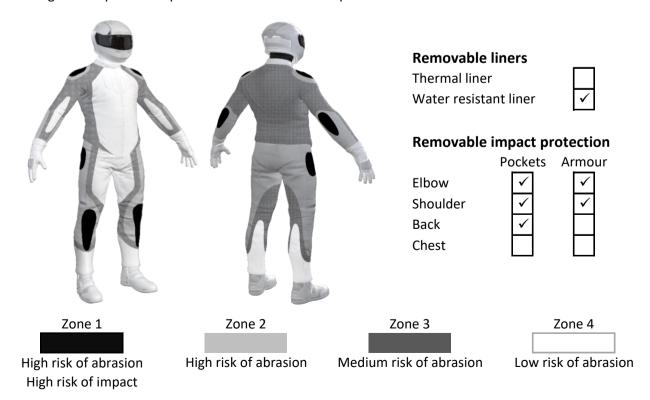

Model Super Rider D-Dry
Type Jacket - Textile
Date purchased 24 March 2025
Sizes tested 56 and 58
Test garment gender Male
Style All Purpose
RRP \$849.00

Test Results Summary	Rating	Score
MotoCAP Protection Rating	*	26.1
Abrasion	2/10	1.78
Burst	10/10	1085
Impact	3/10	21.3
MotoCAP Breathability Rating	**	0.310
Moisture Vapour Resistance	-	51.5
Thermal Resistance	-	0.266
Water resistance	1/10	58.9

This garment is fitted with impact protectors for the elbows and shoulders. A pocket is provided for an aftermarket back protector. Replacing the elbow and shoulder armour with higher performing impact protectors would improve the protection levels of this garment. Mesh panels are located in the arms, chest and back to allow airflow movement through the garment. This garment has a removable water-resistant liner. The breathability rating above was achieved with the water-resistant liner removed. When tested with the water resistant-liner installed, the breathability rating reduced to 1 star.

Jacket and Pants - Crash Impact Risk Zones

This diagram is a pictorial representation of the crash impact risk Zones.

Abrasion Resistance

The jacket was tested for abrasion resistance in accordance with MotoCAP test protocols. The diagram below is a visual indication of the likely abrasion performance of the materials in each zone calculated from the data in the table below. The colour coding is based on the worst performing material in each zone.

Abrasion Resistance Performance

Abrasion rating	2/10
Abrasion score	1.78

Determining Criteria	Area	Good	Acceptable	Marginal	Poor
High abrasion risk	Zone 1 & 2	> 5.6	3.0 - 5.6	1.3 - 2.9	< 1.3
Medium abrasion risk	Zone 3	> 2.5	1.8 - 2.5	0.8 - 1.7	< 0.8
Low abrasion risk	Zone 4	>1.5	1.0 - 1.5	0.4 - 0.9	< 0.4

Individual Abrasion Resistance Results: - The table below shows the test results for time to abrade through all layers of the materials. Calculated for each sample by Zone, type and area coverage of each material as a proportion of that Zone. Abrasion times are capped at a maximum of 10.00s.

Abrasion time for each test (seconds)

Zone 1 & 2	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average	
Material A	80%	3.04	4.61	5.95	7.56			5.29	Α
Material B	20%	0.44	0.38	0.44	0.45	0.63		0.47	Р
Zone 3	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average	
Material B	30%	0.44	0.38	0.44	0.45	0.63		0.47	Р
Material C	70%	0.67	0.50	0.58	0.47	0.53	0.47	0.54	Р
Zone 4	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average	
Material B	40%	0.44	0.38	0.44	0.45	0.63		0.47	М
Material C	60%	0.67	0.50	0.58	0.47	0.53	0.47	0.54	М

Details of materials used in jacket

Material A	Leather shell with mesh inner liner
Material B	Woven fabric shell with mesh inner liner
Material C	Mesh fabric shell with mesh inner liner

Burst Strength

The jacket was tested for burst strength in accordance with MotoCAP test protocols. The diagram below illustrates the burst strength results in terms of the likely performance of the garment in an impact and is a pictorial representation of the data from the table below.

|--|

Burst rating	10/10
Burst score	1085

Determining Criteria	Unit	Good	Acceptable	Marginal	Poor
Burst strength	(kPa)	> 1000	800 - 1000	500 - 799	< 500

Individual Burst Strength Results: - The table below shows the burst pressure in kilopascals (kPA) for each sample tested by Zone and the average result for each zone.

Burst pressure for each seam (kPA)

Area	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average	
Zones 1 & 2	1337	848	955	1385	1278	945	1125	G
Zones 3 & 4	919	739	765	1251	885	998	926	Α

Impact Protection

The jacket was tested for impact protection and coverage in accordance with MotoCAP test protocols. The diagram below is a visual indication of the likely performance of each impact protector calculated from the data in the table below. The colour coding is based on the worst performing score for average or maximum force for each impact zone. Areas shaded black are not considered for impact protection ratings.

Impact Protection Performance

Impact rating	3/10
Impact score	21.3

Determining Criteria	Unit	Good	Acceptable	Marginal	Poor*
Impact force	(kN)	< 15	15 - 24	25 - 30	> 30

^{*} Poor may also indicate that no impact protector, or impact protector pocket is present in the garment

Individual Impact Protector Results: - The table below shows the test results for each strike on each impact protector in kilonewtons (kN) and their area of coverage as a proportion (%) of the Zone. Individual strike results are capped at a maximum of 50kN.

Impact protector type	Elbow	Shoulder
Average force (kN)	25.3 M	28.6 M
Maximum force (kN)	37.3 P	38.5 P
Coverage of Zone 1 area	150%	80%
Coverage of Zone after displacement	100%	80%

Individual Impact Protector Results: - The table below shows the test results for each strike on individual impact protectors in kilonewtons (kN) and the position of the strike. Individual strike results are capped at a maximum of 50kN.

Force transfer for each impact strike (kN)

Impact protector type	Elbow			Shoulder		
Strike location	Centre	Mid	Edge	Centre	Mid	Edge
Impact Protector 1	20.3	26.7	20.5	27.1	34.0	33.3
Impact Protector 2	32.5	29.2	29.5	21.5	23.9	38.5
Impact Protector 3	14.8	16.9	37.3	22.4	27.1	29.9

Breathability

The jacket was tested for breathability following the MotoCAP test protocols. The table below shows the moisture vapour resistance and the thermal resistance values obtained.

Without removable I	With water-resistant liner				
Breathability rating	**	Brea	thability rating	*	
Breathability score	0.310	Brea	thability score	0.241	
Moisture Vapour Resis	stance - R _{et} (kPa.m²/W)	1	2	Average	
Without removable liner	S	53.2	49.9	51.5	
With water-resistant line	er	105.3	103.5	104.4	
Thermal Resistance - I	1	2	Average		
Without removable liner	S	0.264	0.268	0.266	
With water-resistant line	er	0.411	0.429	0.420	

Water spray and rain resistance

This jacket is advertised as water-resistant, and so has been tested for water spray and rain resistance according to the MotoCAP test protocols. The table below shows the water absorbed (ml) and the wetting proportion (%) of the garment and undergarments due to water absorption.

	Water absorbed by garment		Water absorbed by underwear			
	Volume (ml)	Percentage (%)	Volume (ml)	Percentage (%)	Water Resistar	nce
Jacket 1	916	47%	133	47%	Performance	
Jacket 2	836	42%	211	71%	Water rating	1/10
Average	876	45%	172	59%	Water Score	58.92

Location of wetting

There was major wetting to the cotton underwear present at the abdomen, the cuffs of the sleeves and neck for both jackets tested.

Assessment Details.	
Brand	Dainese
Model	Super Rider D-Dry
Туре	Jacket - Textile
Date purchased	24 March 2025
Tested by	AMCAF, Deakin University
Report approved by	MotoCAP Chief Scientist
Garment test reference	J25T21
Rating first published	June 2025
Rating updated	18 June 2025
